RE: Formosa Plastics Corporation, Texas
TCEQ Air Quality Account No. CB-0038-Q
North FTIR Quarterly Report (July 2018 through September 2018)

Dear Air Section Manager:

Please find attached the North FTIR quarterly report. The North FTIR and associated equipment were installed as a Supplemental Environmental Project as required by TCEQ Docket No. 2000-1144-AIR-E. This report includes FTIR data from July 1, 2018 through September 30, 2018. This report is designed to be similar to the Point Comfort FTIR Quarterly Report in order to maintain reporting consistency.

During the third quarter of 2018, the north FTIR site had no confirmed exceedances of the trigger level based on [block] 30-minute averages or [running] 30-minute averages occurred.

Should you have any questions please contact Vanessa Peppers by e-mail at VanessaP@ftpc.fpcusa.com.

Sincerely,

Rick Crabtree
Vice President/General Manager
Formosa Plastics Corporation, Texas

Formosa Plastics Corporation, Texas
Summary of North FTIR Downtime
3rd Quarter 2018

Date(s)	Cause(s)	Corrective Action(s)
7/1/2018-7/2/2018 7/6/2018 8/24/2018 8/25/2018 8/26/2018 9/12/2018	Memory building issue resulted in loss of data.	After cause of issue was found, changes were made to clear memory every 5 minutes.
7/23/2018-7/30/2018	Liquid Nitrogen autofill device failure.	Data collection resumed after autofill device was reconfigured.
7/31/2018 8/20/2018 8/24/2018 9/7/2018 9/14/2018	QA/QC Challenges	
8/12/2018	Low signal periods resulted in the loss of data.	Data collection resumed when signal strength increased.
9/15/2018-9/29/2018	Instrument OBC board failure	Data collection resumed after board was replaced on September 29th.

Formosa Plastics Corporation, Texas

3rd Quarter 2018 North FTIR Report - Summary of Validated Exceedances of the 30-Minute Trigger Levels

Validated Exceedances of the 30-Minute Running Averaged Trigger Levels **

Month/Year	Date	Time	Chemical	Concentrations	Trigger Limit	Wind Speed	Wind Direction
			There were no validated exceedances in the third quarter of 2018.				

Please Note: Polar plots generated by FPC-TXs' FTIR System are attached for those days when the FTIR System detected an exceedance.

* Indicates polar plot is available.

** The FTIR quarterly report format was agreed upon between TNRCC and FPC-TX upon initiation of the monitoring program. The quarterly report shows *block* averages for each 30-minute period throughout the day. The FTIR collects 5-minute data and creates *rolling* 30-minute averages. The table titled "Validated Exceedances of 30-Minute Running Averaged Trigger Levels" lists the exceedances of the 30-minute average trigger levels based on a *rolling* 30-minute average time period. The validated exceedances of the rolling 30-minute averages for the compounds listed in the table titled "Validated Exceedances of 30-Minute Running Averaged Trigger Levels" is being included in the summary table above, as required by paragraph 5, Section c of the January 10, 1996 letter from the TNRCC.

Subject: Formosa North AAMS Gas Challenge Results for July - September 2018

Gas challenges are performed weekly against the OP-FTIR instrument with gases containing the target compounds listed in Table 1. The number of gas challenges performed was limited by instrument and gas standard availability. As such, a total of six independent gas challenges were performed for Q3 2018. Because of its corrosive nature, hydrogen chloride (HCl) was purchased in a separate cylinder and was injected in the calibration cell separate from the rest of the target compounds. The remaining compounds of interest (DCA and VOCs) are all contained within the same gas cylinder. Table 1 lists the challenge compounds and their expected spike concentrations. The expected spike concentrations are arrived at by multiplying the certified cylinder concentrations by the ratio of the calibration cell path length to the open path length (0.10m/270m).

The gas challenge system was not operational remotely until 8/20/2018. There was a single gas challenge performed by staff on-site on 7/31/2018. From 8/20/2018, weekly gas challenges were performed up until 9/14/2018 at which time the OBC board in the instrument failed, resulting in extended instrument downtime. The instrument was restored to full operation on 9/27/2018 but with a backup unit as the failed instrument was transported back to Austin for repair.

Table 1. Formosa North OP-FTIR Gas Challenge Mixtures

Compound	Compound FTIR Code	Expected Spike Level (ppm)
1,3 Butadiene	BUT	0.048
Benzene	C6H6	0.117
Ethylene	C2H4	0.046
Ethylene Oxide	ETO	0.093
Vinyl Chloride	VCl	0.048
1,2 Dichloroethane	DCA	0.093
Hydrogen Chloride	HCl	0.027

A total of 6 challenges were performed during this quarter. All of the gas challenges performed for the 3rd quarter 2018 resulted in acceptable recoveries with the following exceptions:

- DCA standard gas recovered outside criteria high on 8/20/2018.

Analyte spike recovery is expressed as a percentage and calculated by taking the ratio of the actual spike value divided by the expected spike value. The actual spike is calculated by averaging the equilibrium points during a run.

July 2018

Only one gas challenge was conducted in July. Recoveries were acceptable for all compounds in July.

August 2018

Three gas challenges were conducted in August. Recoveries were generally acceptable for all compounds in August, with the aforementioned DCA exception on 8/20/2018.

September 2018

Two gas challenges were conducted in September. Recoveries were acceptable for all compounds in September.

Conclusion

Gas challenge recoveries for the 3rd quarter of 2018 all fell within the 70-130% criteria for all of the target analytes except DCA. DCA recovered outside criteria high on 8/20/2018.

Recovery statistics for the quarter are presented in Table 2. At the bottom of the table, average recoveries for each compound (for the quarter) are given. Individual results are color-coded. **Green** highlights indicate that recovery fell within the 70% to 130% range, while results highlighted in **yellow** fell within a 50% to 150% range. Results outside of the 50% to 150% range are highlighted in **red**.
